STACKING UP BIG-DATA

Big-data is upending legacy technology investments as companies turn to open-source solutions, commodity hardware, and data visualization tools to handle big-data analytics. The big-data stack is fine-tuned for specialized, high-performance processing and storage.

THE LURE OF BIG-DATA

- Promising return on investment
- It can support new applications and projects
- It can help automate existing processes

A NEW ERA FOR ANALYTICS

SMALL, STRUCTURED,
INTERNAL FOCUS

LARGER, MORE
EXTERNALLY FOCUSED

MASSIVE, UNSTRUCTURED,
FASTER, HUGE POTENTIAL
